

CV

I am passionate about merging technology and art to bring innovative ideas to life. I have over 10 years of experience as a software developer and technical leader, with extensive expertise in front-end and full-stack development, product design, and cross-functional collaboration. My proven track record includes leading teams, implementing scalable solutions, and driving projects to successful completion. I excel in working with stakeholders to define user-focused requirements and craft meaningful product experiences across various domains, including finance, ERP, and event registration platforms. I am an advocate for open-source contributions, technical writing, and continuous learning.
